

Setanta Income Opportunities Fund

Q2 2026

Fund Description

The **Income Opportunities Fund** ('the Fund') is an actively managed portfolio primarily comprising global equities but with the flexibility to invest in assets which offer attractive income and reasonable value. These assets include fixed income, property (including REITs) and cash. The Fund is not constrained by limitations on the level of any given asset. In practice, the Fund has had its greatest weight in equities, reflecting the breadth of that market, Setanta's expertise in that area, and the option writing strategy employed by the Fund. Nevertheless, property, fixed income and cash have all played meaningful roles in past returns of the Fund, at times, comprising up to 50% of the Fund's assets. The portfolio is managed in accordance with the Setanta investment philosophy. That is, the managers seek to own good assets for the long-term at prices below what they think they're worth, carefully considering each investment's risk profile. The Fund is managed by three portfolio managers, who also look to leverage off the experience and knowledge of their colleagues. The aim is to achieve a sensible level of diversification on a sector and geographic basis.

The Fund employs an option writing strategy. This entails the sale of both call and put options in return for a cash premium, representing an income stream that boosts the underlying income yield of the Fund. This strategy is employed in a conservative fashion, as all options written are fully covered.

The Income Opportunities Fund has two investment objectives:

1. To generate an annual income yield at a target rate. This is declared at the start of each financial year.
2. To achieve capital appreciation over the long term.
